GROWTH OF ASSETS OVER TIME

Despite an intra-quarter spike in volatility, investors embraced an “everything rally” by the time September ended. The gains were supported by more tepid inflation, declining longer-term interest rates, and a U.S. economy that exhibited few signs of losing positive momentum. Global equity returns were robust nearly across the board in the third quarter, as signs of a shifting leadership regime began to develop, with both international developed and emerging market equities outperforming U.S. large cap, and outperformance also witnessed across small cap versus their larger cap counterparts. The fixed income markets similarly churned out mid-single-digit gains. In real assets, real estate investment trust securities (REITS) were the standout performer, with double-digit total returns.

FROM OUR INVESTMENT PHILOSOPHY

The Foundation recognizes that constituents of the Community have an interest in allocating charitable dollars in a fashion that is consistent with their ethics and values. Further, the Foundation and their consultant recognize the growing amount of research that suggests that incorporating ESG factors into the security selection process can help uncover unaccounted risk and return characteristics that can benefit the portfolio. For these reasons, the Foundation elected to provide an additional investment option for potential donors that desire ESG characteristics in their portfolio.

The pool will have the majority of its assets invested in public equity, with the remainder in fixed income and diversified mutual funds. The ESG pool seeks to hold little to no holdings principally involved in alcohol, tobacco, gambling, adult entertainment, civilian firearms, for-profit prisons, fossil fuel extraction, genetically modified foods, predatory lending, and non-gender diversified Boards while emphasizing investment in companies that hold positive ESG characteristics. The pool also focuses a portion of the assets to address concerns within the Greater Cedar Rapids community.
