

CONSERVATIVE POOL SUMMARY

As of June 30, 2026

The Conservative Pool is designed to be short to intermediate-term in nature and capital preservation is the primary goal. The portfolio makes investments primarily in liquid, publicly traded fixed income securities and cash. The pool will invest a portion of the assets in US-based stocks. This Pool is for agencies and endowments, where the time horizon is in excess of one year and less than five years. The portfolio is allocated across:

- ❖ **Asset class** (stocks, bonds, cash)
- ❖ **Region** (U.S.)
- ❖ **Market Cap** (large mid size companies)
- ❖ **Style** (core, value and growth)
- ❖ **Liquidity** (daily liquid investments)

ASSET ALLOCATION

❖ Domestic Stocks	13%
❖ Core Fixed Income	77%
❖ Money Market & Cash	10%

PERFORMANCE

GROWTH OF ASSETS OVER TIME

QUARTERLY COMMENTARY

Public markets rebounded in the second quarter as easing geopolitical concerns, strong earnings, and investment in artificial intelligence supported the rally. Equities led the advance across most regions, with small cap stocks, emerging markets, and AI-linked sectors among the stronger areas of performance. Fixed income generated modest positive returns despite higher long-term yields, while real assets were mixed, with REITs recovering while energy prices declined sharply. Overall, the quarter reinforced a market environment supported by improving fundamentals but increasingly dependent on sustained earnings growth, capital discipline, and the ability of AI-related investment to translate into durable returns.

FROM OUR INVESTMENT PHILOSOPHY

The conservative pool is designed to generate return in excess of money market with limited stock exposure. The pool is U.S. focused, providing exposure to stocks, cash, U.S. bonds, and money market instruments.

The pool will have approximately ten percent of its assets invested in public equity with the remainder in fixed income and money market. The goal of the pool is to generate returns in excess of cash over a one-year time horizon while maintaining 100% daily liquidity of the assets. Given the pool will invest in small amounts of the stock market it is subject to shorter-term fluctuations and, as such, is not designed as a cash replacement.
